Mountain Weather Forecast

Peak District National Park

Forecast valid from 06:00 on Monday 26 Oct 2020 until 23:59 on Tuesday 27 Oct 2020

Forecast Issued on Monday 26 Oct 2020 at 00:47

Confidence: High for an unsettled spell of weather with rain bands and showers crossing from the west, but lowering confidence in timing and extent of the worst of the conditions as the week unwinds.

Headline for Monday 26 Oct 2020: Showers frequent and heavy through to early afternoon, then turning drier later.

Precipitation probability					
60%	70%	70%	60%	30%	20%

Forecast for Monday 26 Oct 2020

Weather: Showers frequent through the morning and early afternoon, with some heavy, bringing the risk of hail and thunder. Gradually showers turning lighter and less frequent from mid-afternoon and through the evening.

Chance of cloud free mountain/hill tops above 600m: 20% during the morning with bases quite extensive from 450-600m, with patches lower down in heavier showers. Later becoming 60% as bases lift and turn more broken.

Visibility: Mainly good outside of showers with distant ridges visible but perhaps obscured by showers in the distance at times. Visibility will lower to just a few kilometres in showers and it will be very poor in cloud over summits.

Meteorologist's View

Potentially hazardous conditions, chiefly through the morning, with quite extensive hill fog and the risk of thunderstorms. Significant wind chill across higher peaks at first and strongest wind gusts likely to be in/around showers.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Forecast for Tuesday 27 Oct 2020

Weather: A cold start with patchy ground frost in sheltered valleys but cloud rain soon spreading from the west during the morning, bringing with it associated hill fog. This clears erratically to the east during the afternoon and evening, with sharp, perhaps thundery, showers following from the west.

Maximum wind: South or southwest 20mph, gusting 30-35mph.

Chance of cloud free mountain/hill tops above 600m: Lowering to virtually nil from mid-morning as bases become extensive from 450-600m, before erratically increasing later as rain band clears eastwards.

Visibility: Becoming generally moderate or poor in the rain and sporadically in later showers. Very poor in hill fog.

Temperature: **Valleys:** Plus 2 Celsius increasing 11 Celsius during the afternoon
At 600m: Plus 3-5 Celsius
Freezing level: Above summits.
